NET REPORT

DATE:	Type: (circle) Training: SET: Community Event: Severe Weather Activation:
	Emcomm Activation: Other:
NCS :	Name of Event or Reason:
NET START TIME:	
NET END TIME:	This Report is for: VHF VOICE: VHF Digital HF DIGITAL: Winlink:
TOTAL NET MINUTES	
TOTAL CHECK-INS: (including Net Control)	Total Man Hours
ARES MEMBERS	
ARRL/ARES OFFICIALS:	
EMERGENCY POWER AVAILABLE:	
TOTAL TRAFFIC PASSED: (#)	
# OF EACH TYPE Passed: *	Emergency: Priority : Welfare: Routine/Test NTS:
# Community Events : # Participants: Min:	
# SKYWARN Activations: # Participants: Min:	
	Participants:

*Traffic codes: **EMERGENCY** = involves life/death urgency in the absence of regular commercial communications. Includes official messages of welfare agencies requesting supplies, materials, or instructions vital to relief efforts for the stricken populace in emergency areas. *When in doubt, do not use this designation.*

Priority = Important messages having a specific time limit, official messages that are not covered in the emergency category, press dispatches, and emergency-related traffic not of the utmost urgency. **WELFARE** = inquiry about the **health and welfare** of individuals *in a disaster area* or to advise *from* a disaster area that all is well. Welfare is handled only after all Emergency/Priority traffic is passed. **ROUTINE**=should be handled last or not at all in the event of busy higher precedence traffic

NTS=traffic passed to NATIONAL TRAFFIC System.

For all nets, except **Activations and SET**, place a check mark or X in the TIME IN block. For ACTIVATIONS and SET, use the Time checked in/out instead of a check mark or X for man-hour calculations.

****Man Hours:** For Training, multiply the number of check-ins by the total net minutes and divide by sixty. Don't forget to include yourself. ex. A training net had 15 check-ins and lasted 35 minutes. (15 check-ins plus NCS=16), times 35 minutes=560/60=9.33 man- hours.

For Activations, add the minutes for all check ins (using Time In and Time Out), then multiply by the number of check-ins and divide by 60. Once again, count yourself. You may also add 60 minutes for yourself for preparation and reporting.

* Reminder: Storm Spotter Reports are only for reports of hail (by size), wind damage, funnel clouds, tornado on the ground and flooding **going to** the National Weather Service

(NWS). **NWS Updates** are weather Watches and Warnings from NWS. All Storm Spotter Reports should be immediately forwarded to the National Weather Service by the SKYWARN Liaison using the most expedient means. If no Liaison is on frequency, the NCS should pass the traffic

INSTRUCTIONS

This form may be printed out and filled in with ink if desired

Primary Repeater: 145.390 (-.6 MHz, 77 Hz tone) If this repeater goes down, switch to:

First Back-Up Repeater: 145.450 (-.6 MHz, 77 Hz tone)

Second Back-Up repeater: (146.760 (-.6 MHz, 77 Hz tone)

9)

Third Back-Up Repeater: 147.345 (+.6MHz, 100 Hz tone)

Use the **ADDITIONAL CHECK-INS** page only when needed to record overflow from one or more counties. Be sure to indicate the County in the QTH block.

Fill in missing blocks for all check-ins. If new check-ins are recorded or missing blocks are filled in, please indicate.

Record the number of Severe Weather Events and/or Community Events, the type (race, festival, etc.), number of participants and total man hours for each. Please send a brief description of the event on a separate page for inclusion in the State Section Report.

If changes or additions were made to the Net Roster, send the affected page(s) with changes noted, along with the Net Report page to the Net Manager.

If no new check-ins were added to your report and no changes made, just send the completed Net Report page to the Net Manager at

NetManager@MSARES.com

Thank you for your service to Central Mississippi Amateur Radio Emergency Service

Legend: **MIN**=Minutes **PRE/#/SUF**=Call Sign **QTH**=Home **ARES**=Yes/No (if official, use title designation) **EP**=Emergency Power Available **NCS**(Net Control Station)= Yes/No
ALT NCS= Alternate Net Control **NTS LIA**=National Traffic System Liaison **SKY LIA**=SKYWARN Liaison **NWSchat**= Yes/No **NBEMS VHF/HF**=Designate one or both
Winlink (capable)=Yes/NO
